Executive Summary

I am a finance professional with more than 17 years of experience at the intersection of financial markets and business strategy across capital markets, banking, and financial market infrastructure. Throughout my career, I have combined strategic market insights, quantitative methodology, and financial expertise to lead key initiatives across market architecture, Stock Exchange operations, clearing and settlement services, executive decision-making, and risk management. My experience spans bank loan analysis, SME IPO processes, trading floor operations, large-scale capital market infrastructure transformation, executive consultancy within the CEO Office, and enterprise risk frameworks for brokerage operations.

Whether assessing strategic investment programs, conducting multi-asset valuation functions, managing regulatory relations, or overseeing risk management, I align market infrastructure, regulatory standards, and financial management to support institutional growth. I have framed my efforts in line with corporate targets to deliver business-focused outcomes. I have partnered with executive leadership, regulators, financial institutions, and multidisciplinary teams to solve commercial and operational challenges. I complement my industry experience with a PhD in Finance and expertise in asset pricing, financial modeling, optimization, and financial econometrics.

Degrees Awarded

Bogazici University — *Istanbul - Turkey*
PhD in Finance — *Sep. 2015 - Mar. 2021*
- Dissertation: Intraday Correlation Dynamics in Borsa Istanbul Using Score-Driven Kalman Filtering
- Advisor: Assoc. Prof. Cenk C. Karahan

Galatasaray University — *Istanbul - Turkey*
MA in Financial Economics — *Sep. 2011 - Jun. 2012*
- High Honors List

Bogazici University — *Istanbul - Turkey*
BA in Economics — *Sep. 2004 - Jul. 2009*
- Honors List

Areas of Special Interest

Financial Markets, Capital Markets, Banking, Data Science, Risk & Portfolio Management, Macro-finance, Quantitative Finance, Behavioral Finance

Languages

Turkish (Native), English (Fluent), Spanish (Basic)

Professional Experience

10.2025 - Present **Lead Researcher** Center for Applied Research in Finance - Bogazici University

Developing industry-specific financial solutions for financial institutions and corporations. Preparing unsolicited policy recommendations for financial markets and solicited project delivery for local and international agencies. We conduct advanced financial research and transform quantitative methods and market insights into practical solutions for government agencies and private corporations.

09.2023 - 09.2025 **Director of Risk Management** BNP Paribas - TEB Investment Joint Venture

Broadly, playing a pivotal role in overseeing and enhancing the organization's risk management framework. Being responsible for identifying, assessing, and mitigating potential risks across various facets of the brokerage business. Working closely with the senior team to develop and implement risk management strategies to ensure the stability and resilience of the firm in dynamic market environments. Compliance with the legal framework and internal regulations of BNP Paribas. Reporting regularly to the Credit and Audit Committees and the Board. Managing the communications with the Borsa Istanbul Stock Exchange Group.

01.2021 - 09.2023 **Post-doc & Academic Research-** University of Groningen & Bogazici University

Postdoc and academic research on financial markets; mainly the stock markets, mispricing in derivative instruments, and market ambiguity.

04.2015 - 01.2021 **Executive Consultant to CEO (Jul. 2020 - Jan. 2021)** Borsa Istanbul Exchange Group (Post-Trade) - TAKASBANK

Providing the CEO with consultancy on various capital market topics: Stock Exchange operations, clearing and settlement operations, other self-operated markets (Security Lending Market, Takasbank Money Market etc.). Along with that, supervising communications with Central Bank of the Republic of Turkey, the Capital Markets Board of Turkey, the Banking Regulation and Supervision Agency and banks & brokerage houses. Additionally, filtering and examining the requests before they are escalated to the CEO.

Risk & Central Counterparty (Jan. 2020 - Jul. 2020)

Engaging in daily collateral management operations and addressing margin calls induced by open positions across equity, fixed income, derivatives, swaps, and precious metals markets. Collaborating in the calculation of daily option settlement prices in coordination with team members. Compiling ad-hoc reports for CCP activities as requested by international institutions.

Fund Valuation & Custody (Oct. 2017 - Jan. 2020)

Conducting valuations of mutual, pension, real estate, hedge funds, and ETFs to detect deviations from the principles mandated by their respective directives. Ensuring daily communication with the Capital Markets Board of Turkey to report any breaches in investment limits for each asset class as required for each fund type. Additionally, preparing ad-hoc reports for top management and delivering presentations for the monthly ALCO.

Equity Clearing & Settlement - NASDAQ OMX Project Group (Apr. 2015 - Oct. 2017)

Performing clearing and settlement operations within the equity market, including the management of default market transactions for unsettled positions after T+2. Integral involvement in the core team responsible for executing all module tests and acceptance operations related to NASDAQ OMX Clearing and Settlement products. Collaborating closely with NASDAQ OMX teams, as well as equity trading, market surveillance, index provision, data dissemination departments, and IT desks to contribute to market design and product placement. Concurrently, overseeing the amendment of outdated regulations and rule guides in conjunction with colleagues, in response to the ongoing infrastructure transformation

10.2014 - 03.2015 **Financial Planning & Analysis-** adidas GROUP

Financial reporting, financial analysis, budget planning

10.2010 - 06.2014 **Trading Floor and SME IPO-** Borsa Istanbul Exchange Group (Trade) - BORSA ISTANBUL

Primarily, I was tasked with overseeing the initial public offerings of Small and Medium-sized Enterprises and orchestrating market operations from the onset of trading. Concurrently, I played an active role in system enhancement projects and held responsibility for predefined departmental functions and activities on the trading floor. Additionally, I taught in Borsa Istanbul's Applied Capital Markets education program (2011–2012) for senior undergraduate and Master's students.

Professional Experience Continued

08.2009 - 07.2010 **Corporate & Commercial Credits-** GARANTI BBVA

Conducting comprehensive analyses of loan applications directed toward major construction projects was a pivotal aspect of my responsibilities. Weekly presentations to the credit committee involved conveying our assessments and recommendation reports. Additionally, I played a proactive role in on-site monitoring of construction operations, collating pertinent data, and preparing progress reports.

Working Papers

Market Ambiguity and Mispricing in S&P500 Futures Contracts (with Cenk C. Karahan) The present study provides empirical evidence on the effect of multiple priors on futures mispricing, a setting in which traditional mean-variance optimization and the Bayesian framework offer limited explanatory power. We show that the magnitude and direction of mispricing in S&P 500 E-Mini futures contracts are associated with the prevailing degree of market ambiguity, even after controlling for other relevant factors. Our analysis further demonstrates that different levels of uncertainty have distinct implications for both the direction and magnitude of futures mispricing in the U.S. market. A more detailed investigation reveals an asymmetric relationship between ambiguity and mispricing across periods of market euphoria and market distress. Specifically, ambiguity negatively predicts mispricing during the early phases of E-Mini futures trading, whereas this relationship reverses and becomes increasingly positive around the Global Financial Crisis. The existing literature on ambiguity and its market implications relies predominantly on experimental evidence. By employing real market data, this study contributes to the relatively limited empirical literature on ambiguity and asset pricing.

Ongoing

1- From Crash Controls to Smart Halts: Modernizing Circuit Breakers in the Algorithm Era

2- Measurement of Information Asymmetry in Financial Transaction Data (Book Chapter)

3- Solving Idiosyncratic Volatility Puzzle: Discrete vs Continuous Information Flows

Selected Projects

10.2025 - 05.2026 **TransformIndustry — The World Bank & Republic of Turkiye Ministry of Industry and Technology**
Conducted survey design, financial analysis to build policy suggestions for a World Bank credit facility aimed at supporting digital and green transformation projects within the Turkish manufacturing ecosystem. Performed financial benefit assessments across different firm profiles and carried out sensitivity analyses under alternative investment and financing scenarios.

04.2015 - 10.2017 **NASDAQ OMX Project — Borsa Istanbul Exchange Group (Post-Trade)**
Completed product design processes and go-live testing for the NASDAQ OMX Equity Clearing and Settlement modules, while working closely with the Borsa Istanbul Trading and Surveillance teams to ensure alignment between trade and post-trade system design. The project was implemented in multiple phases, and responsibilities spanned all stages of the implementation process, contributing to the enhancement of the operational capabilities of the system.
